

MD ABUL HAYAT

Mailing Address:
Email: mahayat@uark.edu

3217 Bell Engineering, University of Arkansas, Fayetteville, AR 72701, USA
Website: <https://mahayat.github.io/>

EDUCATION

PhD student of Electrical Engineering Expected: May 2022
University of Arkansas, Fayetteville, AR
Relevant Courses: Deep Learning, Machine Learning, Information Theory, Stochastic Processes, Detection & Estimation

Master of Science in Statistics Expected: May 2021
University of Arkansas, Fayetteville, AR
Relevant Courses: Statistical Inference, Computational Statistics, Multivariate Analysis, Time Series Analysis

Bachelor of Science in Electrical & Electronic Engineering September 2015
Bangladesh University of Engineering & Technology (BUET), Dhaka, Bangladesh
Relevant Courses: Digital Signal Processing I & II, Microwave Engineering, Digital Communication, Power System Analysis

TECHNICAL SKILLS

Programming Languages: Python, R, MATLAB, C++, C, SQL, AMPL
Machine Learning Modules: PyTorch, Keras, TensorFlow, NumPy, scikit-learn, Jupyter
Engineering Applications: Simulink, PSpice, PowerWorld, Tableau
Other Skills: Git, Bash, L^AT_EX, Linux, High Performance Computing

WORK EXPERIENCE

University of Arkansas, Fayetteville, AR August 2017 - Present
Graduate Assistant, Electrical Engineering

- Analysis of peripheral venous pressure (PVP) signals under different clinical conditions using deep and statistical learning.
- Developed a Kalman filter and hidden Markov model based unsupervised anomaly detection algorithm for PVP signals.
- Applied deep learning techniques like CNN, Grad-CAM and Guided Backpropagation on PVP signals.
- Developed a Gaussian mixture model (GMM) based Bayesian unsupervised algorithm for rice panicle detection.
- Implementing time-frequency based cyclostationary and synchrosqueezing statistical models on PVP signals.
- Applied classical dimension reduction techniques like PCA, Kernel-PCA; regression techniques like GLM, Elastic net and classification algorithms like k-means, KNN, DBSCAN, SVM in MATLAB and Python.

Lawrence Berkeley National Laboratory, Berkeley, CA August 2020 - Present
Research Affiliate
Summer Intern - Computing Sciences May 2020 - August 2020

- Exploring self-supervised representation learning for photometric redshift prediction (ongoing) using MoCo.
- Trained and validated cosmological image dataset of ~100GB using distributed training on supercomputer Cori.
- Mentor: Mustafa Mustafa

Nokia Bell Labs, Murray Hill, NJ June 2019 - August 2019
Summer Intern - Math & Algorithms

- Implemented U-Net and DenseNet based deep learning segmentation algorithms on OCT images.
- Mentors: Atefeh Mohajeri, William Sean Kennedy

Grameenphone, Dhaka, Bangladesh October 2015 - August 2017
System Engineer, Regional Operations Department

- Grameenphone, part of the Norwegian Telenor Group, is the largest telecommunications operator in Bangladesh.
- Worked with more than 400 BTS/nodeBs of Huawei. Planned and implemented diversity techniques.
- Analyzed and solved performance issues like IPPM loss and Ping Packet loss, MPD degradation and TCH congestion.
- Implemented different radio aggregation techniques on wireless backhaul devices.
